

Olivier Gérard

French, married, born on February 26, 1971 in Reims, France.

8 rue Sophie Germain
75014 Paris
France

Priv. phone: +33-1-43-20-29-33
Prof. phone: +33-1-45-10-68-13
E-mail: Olivier.Gerard@lip6.fr

Internet: <http://www-poleia.lip6.fr/~gerard>

Objective

As a computer scientist, apply my knowledge of neural networks, pattern recognition and 2D-3D image processing and visualization analysis to engineer new applications

Employment history

- 1999 - Project leader at Philips Research Lab, Paris (LEP)**
2D and 3D medical image processing and visualization for X-ray (spine) and ultrasound cardiac applications.
Skills used: 2D and 3D image visualization and processing.
- 1995 - 1999: Research Scientist at Philips Research Lab, Paris (LEP)**
- Development and implementation of a new smart battery management method for portable equipments in a collaboration with Fluke Inc.
Skills used: neural networks, statistics, time series analysis, control theory.
 - Development of an automatic contour extraction technique applied to digital X-ray images of the human heart.
Skills used: neural networks, image processing, Hidden Markov Models.
- June-Sept. 1992: Consulting report: credit card database management for a bank (CIC Paris).**
Detailed study of the database and the queries between the server and the cash (ATM) machines.
- June-Sept. 1991: Research work: time series analysis with neural networks at the *Banque de France*.** Study of new methods for currency exchange rates predictions.

Computer skills

- General:** Artificial intelligence, neural networks, statistics, pattern recognition, 2D and 3D image visualization and processing, speech processing, multimedia technologies
- OS:** Dos, Windows, Unix, Linux
- Programming:** Languages: C, C++, Java, Matlab, SmallTalk, Lisp, Prolog
Internet: HTML, Javascript, Java applets, Webmaster of group for 2 years
Tools: Unix shell scripts, Awk, Linux administration
- Office:** Word processing (Latex, Word), spreadsheet and presentation.

Educational background

- 1995 - 1999:** **PhD candidate in computer science within the LIP6** (CS Lab. of Paris 6 U.).
Defended in June 1999, with distinction. Research in artificial neural networks in collaboration with LEP, the French research lab for **Philips N.V.** Development of algorithms for estimating of evolving parameters with neural networks. Applications in an original system for smart battery management and in a detection task of medical images.
- 1994 - 1995:** **DEA (one year master), Paris 6 University**, with distinction.
Courses in artificial intelligence and pattern recognition. Projects in genetic algorithms and artificial neural networks. Six months thesis at LEP, development of a system for smart battery management based on neural networks.
- 1993 - 1994:** **Master of Computer Science of Florida Tech**, GPA: 4.0.
(*a.k.a.* Florida Institute of Technology, Melbourne, Florida)
Courses on computer graphics, object-oriented programming, formal languages, database management systems, ...
- 1991 - 1994:** **Engineer Degree of Computer Science from EISTI**.
Studying programming techniques (OS, Unix, algorithms, Pascal, C, C++, Prolog), database management (theory, SQL), control theory,... .
Third year specialization in Human - Machine interface and more specifically in computer graphics and speech recognition. Development of a speech recognizer for the spoken French digits.

Linguistic skills

- French:** Mother tongue.
English: Fluent oral and written (10 months stay in the USA).
German: Elementary knowledge.

Hobbies

- Leisure:** Travel (Europe, America), Reading (Sci-Fi,...), Computer (games, personal).
Sports: Basket-ball, downhill skiing, swimming and bicycle riding.
Misc.: Voluntary worker in international projects: environmental protection (Warsaw, Poland, 1988), Habitat for Humanity (Chicago, 1990).
